

1. Record Nr.	UNINA9910780808503321
Autore	Carstairs-McCarthy Andrew <1945->
Titolo	The evolution of morphology [[electronic resource] /] / Andrew Carstairs-McCarthy
Pubbl/distr/stampa	Oxford ; ; New York, : Oxford University Press, c2010
ISBN	1-282-38309-4 9786612383090 0-19-155962-8
Descrizione fisica	1 online resource (267 p.)
Collana	Studies in the evolution of language ; ; 14
Disciplina	415.9
Soggetti	Grammar, Comparative and general - Morphosyntax Historical linguistics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; Preface and acknowledgements; 1 Design in language and design in biology; 2 Why there is morphology: Traditional accounts; 3 A cognitive-articulatory dilemma; 4 Modes of synonymy avoidance; 5 The ancestors of affixes; 6 The ancestors of stem alternants; 7 Derivation, compounding, and lexical storage; 8 Morphological homonymy and morphological meanings; 9 Conclusions; References; Language Index; Name Index; Subject Index
Sommario/riassunto	This book considers the evolution of the grammatical structure of words in the more general contexts of human evolution and the origins of language. The consensus in many fields is that language is well designed for its purpose, and became so either through natural selection or by virtue of non-biological constraints on how language must be structured. Andrew Carstairs-McCarthy argues that in certain crucial respects language is not optimally designed. This can be seen, he suggests, in the existence of not one but two kinds of grammatical organization - syntax and morphology - and in the morpho
