

1. Record Nr.	UNINA9910780879503321
Titolo	Affine Bernstein problems and Monge-Ampere equations [[electronic resource] /] / An-Min Li ... [et al.]
Pubbl/distr/stampa	Singapore ; ; Hackensack, N.J., : World Scientific, c2010
ISBN	1-282-76028-9 9786612760280 981-281-417-5
Descrizione fisica	1 online resource (192 p.)
Altri autori (Persone)	LiAn-Min <1946->
Disciplina	516.36
Soggetti	Affine differential geometry Monge-Ampere equations
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 173-177) and index.
Nota di contenuto	Preface; Contents; 1. Basic Tools; 2. Local Equiaffine Hypersurfaces; 3. Local Relative Hypersurfaces; 4. The Theorem of Jorgens-Calabi-Pogorelov; 5. Affine Maximal Hypersurfaces; 6. Hypersurfaces with Constant Affine Mean Curvature; Bibliography; Index
Sommario/riassunto	In this monograph, the interplay between geometry and partial differential equations (PDEs) is of particular interest. It is well-known that many geometric problems in analytic formulation lead to important classes of PDEs. The focus of this monograph is on variational problems and higher order PDEs for affine hypersurfaces. Affine maximal hypersurfaces are extremals of the interior variation of the affinely invariant volume. The corresponding Euler-Lagrange equation is a highly complicated nonlinear fourth order PDE. In recent years, the global study of such fourth order PDEs has received con
