| | Nota di contenuto | Peritoneal dialysis: past and current practices / Mary C. Mallappallil -- Hemodialysis / Yalemzewd Woredekal -- Kidney transplantation / Fasika Tedla -- Home hemodialysis: present and future therapies / Barbara G. Delano -- Hemofiltration / Halim S. Ghali -- Self-care in-center hemodialysis / Susan H. Bray -- Opting for death rather than dialysis in chronic renal failure / Anthony J. Joseph -- Ethical concerns in marketing kidneys / Amy L. Friedman -- The wearable artificial kidney: a new paradigm in the treatment of ESRD / Victor Gura -- Xenotransplantation / Moro O. Salifu, Syed Shah, and Subodh Saggi -- Can the bowel serve as a kidney? / Eli A. Friedman. |
| | Sommario/riassunto | Written by an interdisciplinary team of experts, this book contains historical information as well as current update on renal replacement therapy. New technology and techniques are presented in a concise, easy-to-read style that keeps the reader interested. The contributors include physicians who practice uremia therapy since its conception to more recent graduates, along with surgeons, pioneers and physicians who are patients themselves, thus giving readers the broadest perspective. The aim of the book is to update the reader on renal |
