Sommario/riassunto	This book is a core introductory text to the subject of toxicology and the use of toxicological information for risk assessment by chemists. Increasingly, chemists are being required by law to advise on the safe handling of chemicals. Few chemists, however, have been trained in toxicology, and the subject is often not covered in a chemistry degree curriculum. It is to address this problem that this book has been written. Fundamental Toxicology for Chemists contains a proposed curriculum for teaching toxicology to chemists, which gives a firm

grounding in the basics. With this book as a guide,
