Sommario/riassunto	The book reviews Nigeria's growth performance and its impact on the

labor market and proposes a growth strategy aimed at further accelerating growth and enhancing the growth elasticity of employment. The growth strategy rests on three pillars: Targeted interventions to address binding constraints in value chains with high growth and employment potential. These binding constraints include poor physical infrastructure and investment climate, lack of access to finance, pervasive skills gaps, and restrictive trade policies. Successful interventions in these value chains need to be designed based
