Includes bibliographical references. Nota di bibliografia Nota di contenuto Contents; Introduction; Nature under siege; Water: whoseproblem is it?; Cities, coasts and community; Waste not, want not; Big picture, big solutions; Endnotes; Acknowledgements; Further reading In this book Dr Geoff Wescott proposes a new approach to Sommario/riassunto environmental decision making. He suggests we move forward from relying solely on individual virtuous action to improve our environment. He argues that the time has come to get 'back to basics': for governments to be decisive and courageous and make positive environmental decisions in the interests of their current and future constituents rather than continue to be locked into short term decision

making at the beck and call of corporations and large political donors.
