

1. Record Nr.	UNINA9910781003303321
Titolo	Preliminary observations on information technology needs and priorities at the centers for Medicare and Medicaid services [[electronic resource]] : an interim report // Committee on Future Information Architectures, Processes, and Strategies for the Centers for Medicare and Medicaid Services Computer Science and Telecommunications Board Division on Engineering and Physical Sciences
Pubbl/distr/stampa	Washington, D.C., : National Academies Press, 2010
ISBN	0-309-18666-8 1-282-97606-0 9786612976063 0-309-17694-8
Descrizione fisica	1 online resource (42 p.)
Disciplina	610.28
Soggetti	Medicare - Technological innovations Medicaid - Technological innovations
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	""Front matter""; ""Preface""; ""Acknowledgment of Reviewers""; ""Contents""; ""1 Context""; ""2 Emerging Requirements Driving Multilayered Transformation""; ""3 Challenges in Transforming Enterprise Technology and Data Management""; ""4 Organizational, Administrative, and Cultural Challenges""; ""5 Concluding Observations""; ""Appendixes""; ""Appendix A: Statement of Task""; ""Appendix B: Biosketches of Committee Members and Staff""
Sommario/riassunto	"Increasingly, the core mission of the Centers for Medicare and Medicaid Services (CMS), an agency of the Department of Health and Human Services, is expanding from one of focusing on prompt claims payment to one of becoming more broadly involved in improving health care quality and efficiency. The requirements for the information technology (IT) systems of CMS are changing as its mission changes, and the efforts to evolve its systems from those designed to support the agency's historical mission come in the midst of a push to

modernize the nation's health care IT more broadly. These new challenges arise even as CMS must meet challenging day-to-day operational requirements and make frequent adjustments to its business processes, code, databases, and systems in response to changing statutory, regulatory, and policy requirements. In light of these and other emerging challenges, CMS asked the National Research Council to conduct a study that would lay out a forward-looking vision for the Centers for Medicare and Medicaid Services, taking account of CMS's mission, business processes, and information technology requirements. This study is being conducted in two phases. The first, resulting in the present volume, draws on a series of teleconferences, briefings, and an information-gathering workshop held in Washington, D.C., on September 27-28, 2010. The second phase, drawing on that workshop and on additional briefings, site visits, and committee deliberations, will result in a final report with recommendations, to be issued at the end of the project in 2011."--Publisher's description.
