Nota di contenuto	To be Mississippian or not to be Mississippian? -- Fort Ancient and the range of Mississippian social complexity -- An approach to the problem -- Corporate behavior in space and time -- Development of village leadership -- Periphery peers -- A model of Fort Ancient village development.
Sommario/riassunto	The last prehistoric cultures to inhabit the Middle Ohio Valley (ca. A.D. 1000-1650) are referred to as Fort Ancient societies, which exhibited a wide variety of Mississippian period characteristics. What is less well-known and little understood are the social processes by which Mississippian characteristics spread to Fort Ancient communities. Through a comprehensive study of SunWatch, one of the few thoroughly excavated Fort Ancient settlements, the author focuses on the development of village social structure within a broad geographic and temporal framework, recognizing border areas as
