Sommario/riassunto	The use of structured frameworks in chemical risk assessment promotes transparent harmonized approaches. This book presents two IPCS frameworks originally published in Critical Reviews in Toxicology in a user-friendly large format. Part 1 contains the IPCS Framework for Analysing the Relevance of a Cancer Mode of Action for Humans along with three case studies illustrating its application. Part 2 contains the

IPCS Framework for Analysing the Relevance of a Non-Cancer Mode of Action for Humans. The output of a framework analysis is a clear statement of conclusions together with the confidence a
