Sommario/riassunto	The present volume consists of nine articles dealing with the role of the constituent 'phonological word' (or 'prosodic word') in various typologically diverse languages. These languages and their respective families subsume Indo-European (Dutch, German, English, European Portuguese), Bantu (SiSwati, KiNande), Algonquian (Cree), Siouan

(Dakota), and Salishan (Lushootseed). One contribution examines the phonological word in a sign language. The theoretical issues dealt with in the book include: evidence for the phonological word (e.g. rules, phonotactics, syllabification, stress patterns),
