Autore	Bakker Karen J
Titolo	Privatizing water [[electronic resource]] : governance failure and the world's urban water crisis // Karen Bakker
Pubbl/distr/stampa	Ithaca, N.Y., : Cornell University Press, c2010
ISBN	0-8014-6700-4 0-8014-7464-7 0-8014-6361-0
Descrizione fisica	1 online resource (319 p.) : ill., maps
Disciplina	363.6/1
Soggetti	Municipal water supply - Political aspects Water utilities - Deregulation Privatization Right to water
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Governance failure : reframing the urban water supply "crisis" -- Material emblems of citizenship : creating "public" water -- Watering the thirsty poor : the water privatization debate -- Citizens without a city : the techno-politics of urban water governance -- Protesting privatization : transnational struggles over the human right to water -- Commons versus commodities : the ambiguous merits of community water-supply management -- Politics and biopolitics : debating ecological governance.
Sommario/riassunto	Water supply privatization was emblematic of the neoliberal turn in development policy in the 1990's. Proponents argued that the private sector could provide better services at lower costs than governments; opponents questioned the risks involved in delegating control over a life-sustaining resource to for-profit companies. Private-sector activity was most concentrated-and contested-in large cities in developing countries, where the widespread lack of access to networked water supplies was characterized as a global crisis. In Privatizing Water, Karen Bakker focuses on three questions: Why did privatization emerge as a preferred alternative for managing urban water supply? Can

privatization fulfill its proponents' expectations, particularly with respect to water supply to the urban poor? And, given the apparent shortcomings of both privatization and conventional approaches to government provision, what are the alternatives? In answering these questions, Bakker engages with broader debates over the role of the private sector in development, the role of urban communities in the provision of "public" services, and the governance of public goods. She introduces the concept of "governance failure" as a means of exploring the limitations facing both private companies and governments. Critically examining a range of issues-including the transnational struggle over the human right to water, the "commons" as a water-supply-management strategy, and the environmental dimensions of water privatization-Privatizing Water is a balanced exploration of a critical issue that affects billions of people around the world.
