Sommario/riassunto	The publication in 1816 of Bopp's Uber das Conjugations system can be considered the beginning of a systematic comparison of Indo-European languages, and thus as having led too the development of the study of language as a science, distinct from philology. The Analytical Comparison (1820) represents not merely a translation into English, as

has been claimed in the literature, but a significant advance in theoretical clarity and methodological soundness. This reprint is accompanied by a bio-bibliographical account of Bopp by J. D. Guignaut, an introduction to Analytical C

Sommario/riassunto	The book explores the clinical challenge of long-term eating disorders and examines the physical and psychological problems, family issues and difficulties in day-to-day living that patients with SEED can experience. Explores the clinical challenge of long-term eating disorders-often compounded by co-morbidity with depression, self-harm, OCD or psychosis Eating disorders can persist for many years, yet are rarely classified as 'severe and enduring' in the way that other disorders such as schizophrenia can be Introduces Severe and Enduring Eating Disorder (SEED) as a concept, and draws on detailed case

histories to describe its assessment and treatment Examines the physical and psychological problems, family issues and difficulties in day-to-day living that patients with SEED can experience Discusses treatment approaches including Rehabilitation Eating Disorders Psychiatry-also covers treatment in a range of different settings.

Sommario/riassunto

This book constitutes the refereed proceedings of CVM 2025, the 13th International Conference on Computational Visual Media, held in Hong Kong SAR, China, in April 2025. The 67 full papers were carefully reviewed and selected from 335 submissions. The papers are organized in topical sections as follows: Part I: Medical Image Analysis, Detection and Recognition, Image Enhancement and Generation, Vision Modeling in Complex Scenarios Part II: 3D Geometry and Rendering, Generation and Editing, Image Processing and Optimization Part III: Image and Video Analysis, Multimodal Learning, Geometrical Processing, Applications.
