| Descrizione fisica | xix, 171 pages : illustrations ; ; 24 cm |
| Altri autori (Persone) | WagstaffAdam |
| Disciplina | 610.285 |
| Soggetti | Medical economics - Data processing Medical economics - Statistical methods |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Description based upon print version of record. |
| Nota di bibliografia | Includes bibliographical references and index. |
| Nota di contenuto | What ADePT health outcomes does -- Data preparation -- Example dataset -- How to generate the tables and graphs -- Interpreting the tables and graphs -- Technical notes -- What ADePT health financing does -- Data preparation -- Example datasets -- How to generate the tables and graphs -- Interpreting the tables and graphs -- Technical notes. |
| Sommario/riassunto | Two key policy goals in the health sector are equity and financial protection. New methods, data and powerful computers have led to a surge of interest in quantitative analysis that permits monitoring progress toward these objectives, and comparisons across countries. ADePT is a new computer program that streamlines and automates such work, ensuring that results are genuinely comparable and allowing them to be produced with a minimum of programming skills. This book provides a step-by-step guide to the use of ADePT for quantitative analysis of equity and financial protection in the health sect |
