

1. Record Nr.	UNISALENT0991003798509707536
Autore	AVR (Conference) (6th; 2019 ; Santa Maria al Bagno, Italy)
Titolo	Augmented reality, virtual reality, and computer graphics : 6th International Conference, AVR 2019, Santa Maria al Bagno, Italy, June 24-27, 2019, Proceedings. Part I / Lucio Tommaso De Paolis, Patrick Bourdot (Eds.)
ISBN	9783030259648
Descrizione fisica	xxiv, 411 p. : ill. ; 24 cm
Collana	Lecture Notes in Computer Science ; 11613
Altri autori (Persone)	De Paolis, Lucio Tommasoauthor Bourdot, Patrickauthor
Disciplina	006.8
Soggetti	Augmented reality - Congresses Virtual reality - Congresses Computer Imaging, Vision, Pattern Recognition and Graphics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index
Sommario/riassunto	The 2-volume set LNCS 11613 and 11614 constitutes the refereed proceedings of the 6th International Conference on Augmented Reality, Virtual Reality, and Computer Graphics, AVR 2019, held in Santa Maria al Bagno, Italy, in June 2019. The 32 full papers and 35 short papers presented were carefully reviewed and selected from numerous submissions. The papers discuss key issues, approaches, ideas, open problems, innovative applications and trends in virtual and augmented reality, 3D visualization and computer graphics in the areas of medicine, cultural heritage, arts, education, entertainment, military and industrial applications. They are organized in the following topical sections: virtual reality; medicine; augmented reality; cultural heritage; education; and industry

Sommario/riassunto	"Eating disorders vary in severity from developmental difficulties in adolescence which may be transitory, to serious and chronic mental illnesses. The Anorexic Mind offers a coherent approach to these difficult and demanding problems, always underlining the point that while many of the manifestations are physical, eating disorders have their origins as well as their solutions, in the mind. While anorexia nervosa may be considered the central syndrome in eating disorders, this book also considers how it links and differs from bulimia nervosa, the more common, related disorder. In the process of the research on anorexia and bulimia, valuable insights have been gained into the very common problem of overeating. The author takes a developmental approach to eating disorders, and is very aware of the continuities between infantile, adolescent and adult experience. Our earliest

relationship is a feeding relationship and feeding difficulties early in life are not rare. The view taken in *The Anorexic Mind* is that feeding difficulties indicate and reflect relationship difficulties whether they occur in infancy, adolescence or adulthood. Most eating disorders apparently begin at adolescence, though if a careful history can be obtained, it is often clear that there have been relationship difficulties at earlier stages of development. If eating disorders are understood as reflections of relationship difficulties, the author believes that they are best treated within a therapeutic relationship. Examples are given of treatment by formal psychotherapy or psychoanalysis where early difficulties become visible and treatable within the transference relationship to the therapist. The most serious cases of anorexia and bulimia nervosa are treated within institutional settings, and many patients have a number of long admissions. Part of the Tavistock Clinic Series."--Provided by publisher.
