Descrizione fisica	1 online resource (0 p.)
Disciplina	362.1969
Soggetti	HIV infections - Treatment - Government policy HIV-positive persons - Care - Government policy - United States HIV-positive persons - Counseling of - United States HIV infections - United States AIDS (Disease) - Patients - Counseling of
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Pages:1 to 25; Pages:26 to 50; Pages:51 to 75; Pages:76 to 100; Pages:101 to 115
Sommario/riassunto	"With the widespread use of highly active anti-retroviral treatment (HAART), HIV has become a chronic, rather than a fatal, disease. But for their treatment to succeed, patients require uninterrupted care from a health care provider and uninterrupted access to anti-HIV medications. The IOM identifies federal, state, and private health insurance policies that inhibit HIV-positive individuals from initiating or continuing their care."--
