

1. Record Nr.	UNISALENT0991003807689707536
Autore	Du Bellay, Joachim <ca. 1524-1560>
Titolo	La defense et illustration de la langue française / par Joachim Du Bellay ; suivi du projet de l'oeuvre intitulée De la précellence du langage françois par Henri Estienne
Pubbl/distr/stampa	Paris : Garnier frères, stampa 1930
Edizione	[Nouvelle éd. revue et annotée /]
Descrizione fisica	VIII, 589 p. ; 19 cm
Altri autori (Persone)	Estienne, Henri Humbert, Louis
Disciplina	448
Lingua di pubblicazione	Francese
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNINA9910781404403321
Autore	Suhler Paul A
Titolo	From RAINBOW to GUSTO : stealth and the design of the Lockheed Blackbird / / Paul A. Suhler ; Ned Allen, editor-in-chief
Pubbl/distr/stampa	Reston, Va., : American Institute of Aeronautics and Astronautics, c2009
ISBN	1-60086-731-6 1-60086-730-8
Descrizione fisica	xvi, 284 p. : ill
Collana	Library of flight
Altri autori (Persone)	AllenNed
Disciplina	623.74/67
Soggetti	SR-71 Blackbird (Jet reconnaissance plane)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	"In 1956, the shock of the 1941 Japanese attack on Pearl Harbor and the horrors of the war that followed were still fresh in the minds of America's leaders. When the Soviet Union exploded its own atomic bomb in August 1949, the sense of vulnerability increased, with the realization that the next surprise attack could destroy American cities and kill millions of people. Deterring an attack required knowing Soviet capabilities and intentions. To gather that information, the U-2 spyplane had begun photographing large sections of the Soviet Union, flying at altitudes far above the reach of their air defenses. But while the U-2 could go where it wanted, the Soviets could track it from border to border. It was only a matter of time before their interceptors or missiles would be able to knock it out of the sky. The only hope was to make the U.S. aircraft invisible to their air defense radars. And if it couldn't be made invisible, then a new aircraft would be needed. This is where the story of stealth and the Blackbird begins."--Publisher's description
