

1. Record Nr.	UNINA9910781405503321
Titolo	Numerical methods for engine-airframe integration [[electronic resource] ] / / edited by S.N.B. Murthy, Gerald C. Paynter
Pubbl/distr/stampa	New York, N.Y., : American Institute of Aeronautics and Astronautics, Inc., c1986
ISBN	1-60086-576-3 1-60086-357-4
Descrizione fisica	1 online resource (555 p.)
Collana	Progress in astronautics and aeronautics ; ; v. 102
Altri autori (Persone)	MurthyS. N. B PaynterGerald C
Disciplina	629.134/31 629.1 s
Soggetti	Airframes - Design and construction Airplanes - Motors
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Technical papers selected from the AIAA 22nd Aerospace Sciences Meeting, January 1984, subsequently revised for this volume, and papers especially invited by the editors for this volume."
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	""Cover""; ""Title""; ""Copyright""; ""Table of Contents""; ""Preface""; ""Chapter I. Fundamental Considerations""; ""Scientific Computing Environment for the 1980's""; ""Prediction of Complex Turbulent Flows: An Overview 1985""; ""A Survey of Composite Grid Generation for General Three-Dimensional Regions""; ""Numerical Solutions of the Compressible Navier-Stokes Equations""; ""Chapter II. Scope and Opportunities""; ""Elements of Computational Engine/Airframe Integration""; ""Computational Requirements for Efficient Engine Installation"" ""Application of CAE and CFD Techniques to Complete Tactical Missile Design"" ""Chapter III. Inviscid and Inviscid Plus Boundary-Layer Methods""; ""CFD Applications to Engine/Airframe Integration""; ""Three-Dimensional Flow Analysis of Turboprop Inlet and Nacelle Configurations""; ""Application of Computational Methods to the Design of Large Turbofan Engine Nacelles""; ""Comparison of Full Potential and Euler Solution Algorithms for Aeropropulsive Flowfield Computations""; ""Subsonic/Transonic/Supersonic Nozzle Flows and Nozzle

Integration"

"Chapter IV. Viscous/Inviscid Interaction and Navier-Stokes Methods"

"Subsonic/Transonic Prediction Capabilities for Nozzle/Afterbody Configurations"; "Three-Dimensional Viscous Design Methodology of Supersonic Inlet Systems for Advanced Technology Aircraft"; "Review of Inlet/Airframe Integration Using Navier-Stokes Computational Fluid Dynamics"; "Chapter V. Summary and Conclusions"; "CFD A User's Technology Assessment"; "Author Index"
