

1. Record Nr.	UNINA9910781417803321
Titolo	Celestial mechanics and astrodynamics [[electronic resource] /] / edited by Victor G. Szebehely
Pubbl/distr/stampa	New York, : Academic Press, 1964
ISBN	1-60086-488-0 1-60086-269-1
Descrizione fisica	1 online resource (765 p.)
Collana	Progress in astronautics and aeronautics ; ; v. 14
Altri autori (Persone)	SzebehelyVictor G. <1921->
Disciplina	521.1
Soggetti	Astronautics Artificial satellites - Orbits
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"A selection of technical papers based mainly on the American Institute of Aeronautics and Astronautics Astrodynamics Conference held at New Haven, Connecticut, August 19-21, 1963."
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	""Cover""; ""Title""; ""Copyright""; ""The ARS Astrodynamics Committee 1962""; ""The AIAA Astrodynamics Committee 1963""; ""The Astrodynamics Conference Committee 1963""; ""Preface""; ""Astrodynamics in the AIAA""; ""Contents""; ""I. Orbit Prediction and General Perturbations""; ""Numerical Aspects of Uniformly Valid Asymptotic Approximations for a Class of Trajectories in the Restricted Three-Body Problem""; ""A Group of Earth-to-Moon Trajectories with Consecutive Collisions""; ""Two Fixed Center Approximations to the Restricted Problem"" ""A High-Order Perturbation Theory Using Rectangular Coordinates"" Trajectories of Satellites under the Influence of Air Drag""; ""II. Astronomical Constants and Physical Properties""; ""System of Astronomical Constants""; ""The Evaluation of Certain Astronomical Constants from the Radio Tracking of Mariner II""; ""Atmospheric Density Determination from Satellite Observations""; ""III. Orbit Selection""; ""Probabilistic Evaluation of Satellite Missions Involving Ground Coverage""; ""Orbital Aspects of Nonsynchronous Communication Satellite Systems"" ""Guidance of Unmanned Lunar and Interplanetary Spacecraft""""An Approximate Method for Computing Error Coefficient Matrices for

Lunar Trajectories"; "Minimum Lunar Orbit Inclination to Lunar Equatorial Plane for Earth-Launched Vehicle"; "General Characteristics of the Launch Window for Orbital Launch to the Moon"; "Launch Windows for Highly Eccentric Orbits"; "Moon-to-Earth Trajectories"; "An Analysis of Free Return Circumlunar Trajectories"; "Free Return Circumlunar Trajectories from Launch Windows with Fixed Launch Azimuths"

"IV. Orbit Mechanics of the Ranger and Mariner Missions""Trajectory Design for Ranger and Mariner Missions"; "Boost Vehicle Trajectories for Ranger and Mariner Programs"; "Launch-to-Mission Completion Targeting for Ranger and Mariner Missions"; "V. Orbit Transfer and Trajectory Optimization"; "A Trajectory Optimization Technique Based upon the Theory of the Second Variation"; "Minimum Impulse Transfer"; "On Some Single-Impulse Transfer Problems"; "Analysis of the Orbital Transfer Problem in Three-Dimensional Space"; "VI. Orbit Determination"

"Position and Velocity Estimates by Trajectory Rectification""Self-Contained Orbit Determination Techniques"; "Linearized Drag Analysis and Orbit Determination"; "Orbit Determination in the Presence of Systematic Errors"; "Contributors to Volume 14"
