Sommario/riassunto

European identity has always been in a state of construction. With the creation of the European Union, however, this construction now takes place within an institutional framework, introducing a number of new variables. Selçen Çener's *Turkey and the European Union: The Question of European Identity* is an in-depth analysis of the influence of these two entities on each others' identity as Europeans in a society of increasing social, political, and cultural connectedness.
