Sommario/riassunto	In 1997, Eisenbrauns published the highly-regarded two-volume Phonologies of Asia and Africa, edited by Alan Kaye with the assistance of Peter T. Daniels, and the book rapidly became the standard reference for the phonologies of the Afro-Asiatic languages. Now the concept has been extended, and Kaye has assembled nearly 50 scholars to write essays on the morphologies of the same language group. The coverage is complete, copious, and again will likely become the standard work in the field. Contributors are an international Who's Who of Afro-Asiatic linguistics, from Appleyard to Leslau to Voigt. It is with great sadness that we report the death of Alan Kaye on May 31, 2007, while these volumes were in the final stages of preparation for the press. Alan was diagnosed with bone cancer on May 1 while on research leave in the United Arab Emirates and was brought home to Fullerton by his son on May 22.
