1.	Record Nr.	UNINA9910781508203321
	Autore	St. Cyr Ken
	Titolo	Automating Active Directory Administration with Windows PowerShell 2.0 [[electronic resource] /] / Ken St. Cyr, Laura E. Hunter
	Pubbl/distr/stampa	New York, : Wiley, 2011 Indiana, : Wiley, ©2011
	ISBN	1-283-17731-5 9786613177315 1-118-11854-5
	Edizione	[1st edition]
	Descrizione fisica	1 online resource (506 p.)
	Classificazione	COM046050
	Altri autori (Persone)	HunterLaura E
	Disciplina	005.71376
	Soggetti	Directory services (Computer network technology) Windows PowerShell (Computer program language) COMPUTERS / Operating Systems / Windows Server & NT
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di contenuto	Automating Active Directory® Administration with Windows PowerShell® 2.0; Table of Contents; Introduction; Part I Administering Service Delivery; Part II Managing Active Directory Data; Part III Protecting Your Investment in Active Directory; Index
	Sommario/riassunto	"Why perform a task with dozens of clicks through the Graphical User Interface when you can do it with a single command? Why repeat the same tasks when can automate them? Administrators can work efficiently and effectively by automating both simple and complex administrative tasks using Windows PowerShell cmdlets. In Microsoft Windows Server 2008 R2, the new Active Directory module for Windows PowerShell provides command-line scripting for administrative, configuration, and diagnostic tasks. The Active Directory module enables end-to-end manageability with Exchange Server, Group Policy, and other services, providing a centralized experience for administering your directory service--and automating it. Focused on everyday and frequently-performed tasks, Automating Active Directory Administration with Windows PowerShell 2.0 provides PowerShell solutions for maintaining a Windows Server 2008 R2 environment.

Solutions are presented step by step, making it easy for Windows administrators to apply on the job, while the necessary concepts explained and real world examples provided help administrators understand what they are doing"-- $c Provided by publisher.
