### Sommario/riassunto

Coined by artist and media researcher Bill Seaman, "neosentience" describes a new branch of scientific inquiry related to artificial intelligence. This volume explores the groundbreaking work of Seaman and chaos physicist Otto E. Rossler in exploring the potential of an intelligent robotic entity possessed of a form of sentience that ever-more-closely resembles that of a human being. Individual chapters approach the concept from a range of disciplines, including psychology, neuroscience, linguistics, and the arts. Neosentience is a burgeoning area of interest, and this book encourages readers
