Sommario/riassunto	The guiding thread of this theoretical review is the illumination of the impasses of binary thought and of the essentialist conceptions of women and the feminine. In this trajectory, the author's ongoing

dialogue with Freud is connected with one aspect of his way of thinking: multicentred and complex. The text addresses questions relating to love, sexual desire, maternity, beauty and the passing of time and highlights current debates concerning women, the feminine, and sexual difference as well as some controversial topics that have been discussed throughout the history of the psychoanalytic movement. One of the most relevant subjects is the notion of 'feminine enigma' and the conceptions of the feminine as the negative of the masculine, which means going into the nature-nurture debate, as well as into considerations of the feminine seen as the other of the masculine. The author points out that the notion of 'feminine enigma' is a displacement of the enigmas inherent to the origins, to the finite time of life (the inevitability of death) and to sexual difference.

### Sommario/riassunto

Paul Farmer has battled AIDS in rural Haiti and deadly strains of drug-resistant tuberculosis in the slums of Peru. A physician-anthropologist with more than fifteen years in the field, Farmer writes from the front lines of the war against these modern plagues and shows why, even more than those of history, they target the poor. This "peculiarly modern inequality" that permeates AIDS, TB, malaria, and typhoid in the modern world, and that feeds emerging (or re-emerging) infectious diseases such as Ebola and cholera, is laid bare in Farmer's harrowing stories of sickness and suffering. Challenging the accepted methodologies of epidemiology and international health, he points out that most current explanatory strategies, from "cost-effectiveness" to patient "noncompliance," inevitably lead to blaming the victims. In reality, larger forces, global as well as local, determine why some people are sick and others are shielded from risk. Yet this moving account is far from a hopeless inventory of insoluble problems. Farmer writes of what can be done in the face of seemingly overwhelming odds, by physicians determined to treat those in need. Infections and Inequalities weds meticulous scholarship with a passion for solutions-remedies for the plagues of the poor and the social maladies that have sustained them.

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	part 1. Basic concepts -- part 2. Clinical cases.
Sommario/riassunto	This book provides students, practitioners, residents, and surgeons with an easily accessible and visual guide to successful methods of repairing more common fractures of dogs and cats. The concept allows clinicians to easily compare a fracture of a patient presented to them to the book and see what successful repairs were performed. There is also dialogue on the treatment options and special considerations. Importantly, follow-up radiographs provide insight into what type and rate of healing is to be expected.
