Sommario/riassunto	The paediatric endocrinologist deals not only with common problems involving growth, puberty, and diabetes, but also with specific hormonal defects involving glands such as the thyroid, parathyroid, adrenals, and pituitary. These can vary from common variants of normals which will be encountered by all doctors dealing with children, to more rare disorders requiring specialist input.Paediatric

Endocrinology and Diabetes is written by two experienced paediatric endocrinologists, and deals with anatomy and physiology before moving on to identification, investigation and management of specific end
