## Sommario/riassunto

The nine articles in this volume were originally presented at the VIII. Symposium Hellenisticum in Lille in August 1998. The authors discuss a set of theological questions that were central to the doctrines of the dominant schools in the Hellenistic age, such as the existence of the gods, their nature, and their concern for humankind. While the philosophers of the Classical age had kept their distance from conventional religion, the Stoics and Epicureans saw the need to come to terms with the religious tradition both in a critical and in a supportive sense. Especially the challenge by the Sceptics forced the followers of the dogmatic schools (Stoics, Epicureans) to clarify the basis of their theological tenets. Many of the texts that are accessible to us only in a fragmentary state were still highly influential in the early Christian era, so that the reconstruction of the theological views of the Hellenistic philosophers form an important part not only of the history of philosophy, but also of Christian theology and the history of religion in general. One distinctive feature of the volume is that it mirrors the changes of perspective that took place over the many centuries in this area, thus presenting the Hellenistic contribution within the larger framework of Greek philosophical theology.

Sommario/riassunto	The books in The Other Voice in Early Modern Europe series chronicle the heretofore neglected stories of women between 1400 and 1700 with the aim of reviving scholarly interest in their thought as expressed in a full range of genres: treatises, orations, and history; lyric, epic, and dramatic poetry; novels and novellas; letters, biography, and autobiography; philosophy and science. Teaching Other Voices: Women and Religion in Early Modern Europe complements these rich volumes by identifying themes useful in literature, history, religion, women's studies, and introductory humanities courses. The volume's introduction, essays, and suggested course materials are intended as guides for teachers--but will serve the needs of students and scholars as well.
