Autore	Balmaceda Margarita Mercedes <1965->
Titolo	Russian energy chains : the remaking of technopolitics from Siberia to Ukraine to the European Union // Margarita Mercedes Balmaceda
Pubbl/distr/stampa	New York, New York : , : Columbia University Press, , [2021] Â©2021
ISBN	0-231-55219-X
Descrizione fisica	1 online resource (440 pages) : illustrations
Collana	Woodrow Wilson Center Press Series
Disciplina	333.790947
Soggetti	Energy development - Russia (Federation) Energy industries - Russia (Federation) Energy policy - Russia (Federation)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter -- Contents -- Acknowledgments -- A Note on How to Read This Book -- A Note on Transliteration and Measurement Units -- PART ONE. The Overall Framework -- Chapter One. Dependency on Russian Energy: Threat or Opportunity? -- Chapter Two. Is Energy a Weapon or a Constituent Part of Disaggregated Power Relations? -- Chapter Three. Energy: Materiality and Power -- PART TWO. Hydrocarbon Chains and Political Power -- Chapter Four. Natural Gas: Managing Pressure from Western Siberia to the Nürnberg Power Plant -- Chapter Five. Oil: Managing Value Swings from Siberian Fields to Gasoline Stations in Germany -- Chapter Six. Coal: Managing Subsidies from Kuzbass to Ukraine's Metallurgical Complex in the Donbas to Germany -- PART THREE. New Types of Energy and New Political Chains -- Chapter Seven. And the Chains Meet Again -- Chapter Eight. Disruptive Energies and the Tentative End of a System: An Epilogue -- Appendix A: Glossary of Key Technical Terms in the Natural Gas, Oil, and Coal-Metallurgical Chains -- Appendix B: Main Actors -- Appendix C: Chronologies of Main Natural Gas, Oil, and Coal Market Events for Russia, Ukraine, and the European Union -- Notes -- Selected Bibliography -- Index
Sommario/riassunto	Russia's use of its vast energy resources for leverage against post-

Soviet states such as Ukraine is widely recognized as a threat. Yet we cannot understand this danger without also understanding the opportunity that Russian energy represents. From corruption-related profits to transportation-fee income to subsidized prices, many within these states have benefited by participating in Russian energy exports. To understand Russian energy power in the region, it is necessary to look at the entire value chain—including production, processing, transportation, and marketing—and at the full spectrum of domestic and external actors involved, from Gazprom to regional oligarchs to European Union regulators. This book follows Russia's three largest fossil-fuel exports—natural gas, oil, and coal—from production in Siberia through transportation via Ukraine to final use in Germany in order to understand the tension between energy as threat and as opportunity. Margarita M. Balmaceda reveals how this dynamic has been a key driver of political development in post-Soviet states in the period between independence in 1991 and Russia's annexation of Crimea in 2014. She analyzes how the physical characteristics of different types of energy, by shaping how they can be transported, distributed, and even stolen, affect how each is used—not only technically but also politically. Both a geopolitical travelogue of the journey of three fossil fuels across continents and an incisive analysis of technology's role in fossil-fuel politics and economics, this book offers new ways of thinking about energy in Eurasia and beyond.

Sommario/riassunto	The collapse of the World Trade Center shattered windows across the street in Battery Park City, throwing the neighborhood into darkness and smothering homes in debris. Residents fled. In the months and years after they returned, they worked to restore their community. Until September 11, Battery Park City had been a secluded, wealthy enclave just west Wall Street, one with all the opulence of the surrounding corporate headquarters yet with a gated, suburban feel. After the towers fell it became the most visible neighborhood in New York. This ethnography of an elite planned community near the heart of New York City's financial district examines both the struggles and shortcomings of one of the city's wealthiest neighborhoods. In doing so, September 12 discovers the vibrant exclusivity that makes Battery Park City an

unmatched place to live for the few who can gain entry. Focusing on both the global forces that shape local landscapes and the exclusion that segregates American urban development, Smithsimon shows the tensions at work as the neighborhood's residents mobilized to influence reconstruction plans. September 12 reveals previously unseen conflicts over the redevelopment of Lower Manhattan, providing a new understanding of the ongoing, reciprocal relationship between social conflicts and the spaces they both inhabit and create.
