perspective / Revel, Michel -- 17 The future of human embryonic stem cell research: medical, legal, and ethical perspectives / Hovatta, Outi / Rodriguez-Wallberg, Kenny A. -- 18 Preservation of fertility in children with cancer: medical, ethical, and legal aspects / Ryan, Ginny -- 19 Fertility preservation for cancer patients: a review of current options and their advantages and disadvantages / Reinblatt, Shauna / Ata, Barnis / Shalom-Paz, Einat / Tan, Seang Lin / Holzer, Hananel -- 20 Sexual orientation and use of assisted reproductive technology: social and psychological issues / Riskind, Rachel G. -- 21 Access to fertility treatment by lesbian couples / Marina, Simón / Marina, Fernando / Marina, David -- 22 ART practice and tourism / Inhorn, Marcia C. / Patrizio, Pasquale -- 23 A savior child conceived by PGD/HLA: medical and ethical aspects / Hui, Edwin C. -- 24 Posthumous reproduction: ethical and legal perspectives / Spielman, Bethany -- 25 Human reproductive cloning: ethical perspectives / Jensen, David A. -- 26 ART practice - religious views / Schenker, Joseph G. -- 27 A Catholic ethical perspective on human reproductive technology / Ford, Norman -- 28 Islamic laws and reproduction / Serour, Gamal I. -- 29 Jewish law (halakha) and reproduction / Schenker, Joseph G. -- 30 Commercialized assisted reproduction / Kepelka, Filip -- 31 The intersection between economic and ethical aspects of ART / Chambers, Georgina M.

Sommario/riassunto

Assisted reproductive technologies (ART) include the artificial or partially artificial methods to achieve pregnancy. These new technologies lead to substantial changes regarding of ethical and legal aspects in reproductive medicine. The book focuses on current hot topics about ethical dilemmas in ART, e.g. about the duties of ethical committees, guidelines regarding informed consent, ethical and legal aspects of sperm donation, embryo donation, ethics of embryonic stem cells, therapeutical cloning, patenting of human genes, commercialization.
