Sommario/riassunto	Dependent-Head Synthesis in Nivkh has been awarded a prize of the Offermann-Hergarten Donation at the University of Cologne in 2004. The endowments are granted for outstanding innovative and comprehensibly documented research.This book offers an innovative approach to three interlaced topics: A systematic analysis of the morphosyntatic organization of Nivkh (Paleosiberian); a cross-linguistic investigation of complex noun forms (parallel to complex (polysynthetic) verb forms); and a typology of polysynthesis. Nivkh (Gilyak) is linguistically remarkable because of its highly complex word
