Acquiring technology from abroad-leveraging the resources of foreign investors and inventors; 3. Connecting research to firms-options for reforming the public RDIs; 4. Bringing innovations to market-boosting private incentives through public instruments; References; Boxes; Figures; Tables
Sommario/riassunto	Innovation and technology absorption are now firmly recognized as one of the main sources of economic growth for emerging and advanced economies alike. That is why innovation is seen as a possible catalyst for revitalizing post-transition economies hit hard by the recent financial and economic crisis.Is government intervention needed to foster innovation in post-transition economies? This is the central question to which this book responds. The answer is yes, but a qualified yes. Innovation activities are rife with market failures that tend to hold back private investment. And badly designed o
