

1. Record Nr.	UNINA9910781755803321
Titolo	Inter-laboratory study on electrochemical methods for the characterization of CoCrMo biomedical alloys in simulated body fluids [[electronic resource] /] / edited by A. Igual Munoz & S. Mischler
Pubbl/distr/stampa	Leeds, U.K., : Maney Pub., 2011
ISBN	1-000-15031-3 1-283-28669-6 9786613286697 1-61344-279-3 1-907975-24-1
Descrizione fisica	1 online resource (128 p.)
Collana	European Federation of Corrosion publications, , 1354-5116 ; ; no. 61
Altri autori (Persone)	Igual MunozA MischlerS
Disciplina	620.11223
Soggetti	Electrolytic corrosion
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Published for the European Federation of Corrosion by Maney Publishing on behalf of the Institute of Materials, Minerals & Mining."
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Title page; Contents; European Federation of Corrosion (EFC) publications: Series introduction; Volumes in the EFC series; Preface; List of symbols; 1 Introduction and rationale; 2 State-of-the-art; 3 Guidelines; 4 Results; 5 Discussion; 6 Guidelines; Appendix A Direct current (DC) results: Polarisation curves with and without albumin obtained by each laboratory; Appendix B Alternating current (AC) results: Impedance spectra obtained by each participant laboratory at 0.15 VSHE and OCP with and without albumin; References
Sommario/riassunto	This publication reports the results of an inter-laboratory investigation evaluating the reproducibility of electrochemical test protocols commonly used in research assessing the corrosion behaviour of biomedical CoCrMo alloys used for artificial joints.
