Sommario/riassunto

Public governance is one of the most important topics in public administration and political science worldwide. It is of special importance to many Asian countries struggling with governance issues related to environmental concerns, democracy, service delivery and economic growth. The purpose of these innovations is to bring about radical governance improvements, promote citizen participation and utilize private sector organizations in the provision of public services. Innovativeness in Asian countries seems to be heavily constrained by unique historical developments, cultural features, develo
