Sommario/riassunto	Moral Laboratories is an engaging ethnography and a groundbreaking foray into the anthropology of morality. It takes us on a journey into the lives of African American families caring for children with serious chronic medical conditions, and it foregrounds the uncertainty that affects their struggles for a good life. Challenging depictions of moral transformation as possible only in moments of breakdown or in radical breaches from the ordinary, it offers a compelling portrait of the

transformative powers embedded in day-to-day existence. From soccer fields to dinner tables, the everyday emerges as a moral laboratory for reshaping moral life. Cheryl Mattingly offers vivid and heart-wrenching stories to elaborate a first-person ethical framework, forcefully showing the limits of third-person renderings of morality.

Sommario/riassunto	In Minimal Words in a Minimal Syntax the author combines a detailed description of the morphological structure of words in Swedish with a daring new approach to theoretical morphology, based on the Minimalist Program of Chomsky (1995) (as developed for syntactic structure). The X-bar theoretic approach to word structure of the Principles and Parameters framework is replaced by a rule free approach incorporating only Merge and Move as structure building devices. The author argues that stems have no word class features, which are provided inflectional affixes (including theme vowels etc.)
