Sommario/riassunto

This volume comprises contributions of three conferences, on legal deposit in a digital environment, on web harvesting and archiving as well as newspapers in the geographical context of the Mediterranean. The main focus is on how to acquire, preserve and make available digital files. Issues that continue to be hot topics also in a world dominated by monographs.

Sommario/riassunto

Long description: Die vorliegende Studie zeigt, dass Humor als Qualitätsmerkmal des Chemieunterrichts angesehen werden kann. Sowohl Lehrkräfte als auch Schülerinnen und Schüler schreiben ihm eine große Bedeutung zu. Bei der Unterrichtsplanung wird Humor jedoch nur gelegentlich bis gar nicht berücksichtigt und bei keinem der

untersuchten Chemieschulbücher kann von einer humorvollen Gestaltung gesprochen werden. Um Humor für die chemiedidaktische Forschung zugänglich zu machen, erfolgt zunächst eine theoretische Fundierung. Darauf aufbauend entsteht die Theorie des Chemiespezifischen Humors, die aus einem schulbezogenen Konzept, einem schulbezogenen Modell und einem allgemeinen Konzept besteht. Chemiespezifischer Humor (ChH) lässt sich demnach als Merkmal von Lehr-Lernmaterial didaktisch modellieren und in Hinsicht auf seine Wirkung untersuchen. Im Zentrum der Hauptuntersuchung steht selbst entwickeltes Lernmaterial zum Thema Periodensystem der Elemente für die Jahrgangsstufe 8 der Realschule in den Varianten mit ChH und ohne ChH. Dabei zeigt sich in Hinsicht auf die Attraktivität ein deutlicher Vorteil des ChH-Materials. Auch wirkt ChH-Material besser auf das von den Schülerinnen und Schülern zu erwerbende Fachwissen. Ein Einfluss auf das situationale/thematische Interesse konnte hingegen nicht nachgewiesen werden.
