

1. Record Nr.	UNINA990001048510403321
Autore	Rechenberg, Helmut
Titolo	Proceedings of Seminar on Unified Theories of Elementary Particles July 1965 : Max-Planck-Institut fur Physik und Astrophysik / H. Rechenberg
Pubbl/distr/stampa	Munchen : Max-Plank-Institute fur Physik, 1965
Disciplina	539.72539.73
Locazione	FI1
Collocazione	33-083
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
2. Record Nr.	UNINA9910781800903321
Autore	Foley Elizabeth Price
Titolo	The law of life and death [[electronic resource] /] / Elizabeth Price Foley
Pubbl/distr/stampa	Cambridge, Mass., : Harvard University Press, 2011
ISBN	0-674-26353-7 0-674-06090-3
Descrizione fisica	1 online resource (315 p.)
Disciplina	344.7304/19
Soggetti	Death - Proof and certification - United States Life and death, Power over - Moral and ethical aspects Life and death, Power over - Decision making Right to life - United States Right to die - Law and legislation - United States Euthanasia - Law and legislation - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references (p. [259]-296) and index.
Nota di contenuto	Statutory and common law life -- Constitutional life --

Cardiopulmonary death -- Brain death -- Constitutional death -- Not dead yet -- Unbeing dead isn't being alive.

Sommario/riassunto

Are you alive? What makes you so sure? Most people believe this question has a clear answer-that some law defines our status as living (or not) for all purposes. But they are dead wrong. In this pioneering study, Elizabeth Price Foley examines the many, and surprisingly ambiguous, legal definitions of what counts as human life and death. Foley reveals that "not being dead" is not necessarily the same as being alive, in the eyes of the law. People, pre-viable fetuses, and post-viable fetuses have different sets of legal rights, which explains the law's seemingly inconsistent approach to stem cell research, in vitro fertilization, frozen embryos, in utero embryos, contraception, abortion, homicide, and wrongful death. In a detailed analysis that is sure to be controversial, Foley shows how the need for more organ transplants and the need to conserve health care resources are exerting steady pressure to expand the legal definition of death. As a result, death is being declared faster than ever before. The "right to die," Foley worries, may be morphing slowly into an obligation to die. Foley's balanced, accessible chapters explore the most contentious legal issues of our time-including cryogenics, feticide, abortion, physician-assisted suicide, brain death, vegetative and minimally conscious states, informed consent, and advance directives-across constitutional, contract, tort, property, and criminal law. Ultimately, she suggests, the inconsistencies and ambiguities in U.S. laws governing life and death may be culturally, and perhaps even psychologically, necessary for an enormous and diverse country like ours.
