Sommario/riassunto	The United States in the World Economy offers the results of a conference organized by the National Bureau of Economics in 1987. The volume includes background papers prepared by nine academic economists, personal statements by individuals prominent in government and business, and summaries of the discussion that followed the presentations. Among the topics considered are foreign

competition in Latin America and the Asian Pacific Rim, Third World debts, innovations in international financial markets, changing patterns of international investment, international capital flows, a
