Sommario/riassunto	The growth of international trade and investment and the spread of bilateral and multilateral trade agreements have resulted in increasing economic integration, affecting almost all nations of the world. This has brought about many changes in the economies of developing countries, including a move away from state-controlled enterprise. However, it has also made developing countries more vulnerable to new and potentially harmful types of anticompetitive business practices. This book demonstrates the importance of true and fair competition to sustainable development and an effective marketplace,
