Focus Constructions; 9. Subject-to-Object Raising; 10. Lexical Causatives; 11. Syntactic Causatives; 12. Case and Word Order; 13. Floated Quantifiers; 14. Some Special Challenges; 15. The Acquisition Problem; 16. Concluding Remarks; Notes; REFERENCES; Index
	Sommario/riassunto	The principal objective of this book is to provide a unified treatment of morphological case in Korean. Focussing on the nominative, accusative and dative suffixes, the author seeks to show that each of these morphemes consistently encodes a corresponding combinatorial relation in the surface' form of sentences. In support of his analysis, the author discusses a broad and representative range of Korean case

marking patterns, providing one of the more complete treatments of case available for any language.
