

1. Record Nr.	UNINA9910781844203321
Autore	Lester Richard K (Richard Keith), <1954->
Titolo	Unlocking energy innovation : how America can build a low-cost, low-carbon energy system // Richard K. Lester and David M. Hart
Pubbl/distr/stampa	Cambridge, Mass., : MIT Press, ©2012
ISBN	0-262-30018-4 1-283-30295-0 9786613302953 0-262-30017-6
Descrizione fisica	1 online resource (xiv, 216 pages) : illustrations
Altri autori (Persone)	HartDavid M. <1961->
Disciplina	333.790973
Soggetti	Energy industries - Technological innovations - United States Renewable energy sources - Technological innovations - United States Technology and state - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Beyond wishful thinking : facts, deductions, and grounded assertions about climate and energy -- An energy innovation system that works -- Electric utilities and the three waves of energy innovation -- The first wave : unlocking innovation in building energy efficiency -- The second wave of innovation-Part 1 : Low-carbon electricity supply -- The second wave of innovation-Part 2 : The rest of the electricity system -- The third wave of innovation : creating breakthrough options -- Building a new American energy innovation system : a ten-point framework.
Sommario/riassunto	"The authors outline three waves of energy innovation to reveal how America can speed up the introduction of new technologies and business models and accelerate deployment on a massive scale"-- Publisher.
