

1. Record Nr.	UNINA9910781873703321
Autore	O'Meara Stephen James <1956->
Titolo	The secret deep // Stephen James O'Meara ; with object photos by Mario Motta [[electronic resource]]
Pubbl/distr/stampa	Cambridge : , : Cambridge University Press, , 2011
ISBN	1-107-21516-1 1-139-09738-5 1-139-10074-2 1-139-09871-3 1-139-10140-4 0-511-97347-0 1-139-09939-6
Descrizione fisica	1 online resource (xiii, 483 pages) : digital, PDF file(s)
Collana	Deep-sky companions The secret deep
Disciplina	523
Soggetti	Galaxies Astronomy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di contenuto	About this book -- The secret deep -- Appendix A. The secret deep : basic data -- Appendix B. Twenty additional secret deep objects -- Appendix C. Deep-sky lists : comparison table-- Appendix D. Photo credits -- The secret deep checklist.
Sommario/riassunto	In this fresh list, Stephen James O'Meara presents 109 new objects for stargazers to observe. The Secret Deep list contains many exceptional objects, including a planetary nebula whose last thermal pulse produced a circumstellar shell similar to the one expected in the final days of our Sun's life; a piece of the only supernova remnant known visible to the unaided eye; the flattest galaxy known; the largest edge-on galaxy in the heavens; the brightest quasar; and the companion star to one of the first black hole candidates ever discovered. Each object is accompanied by beautiful photographs and sketches, original finder charts, visual histories and up-to-date astrophysical information to enrich the observing experience. Featuring galaxies, clusters and nebulae not covered in other Deep-Sky Companions books, this is a

wonderful addition to the series and an essential guide for any deep-sky observer.
