	Sommario/riassunto	During the early years of the Iraq War, the US Army was unable to translate initial combat success into strategic and political victory. Iraq plunged into a complex insurgency, and defeating this insurgency required beating highly adaptive foes. A competition between the hierarchical and vertically integrated army and networked and horizontally integrated insurgents ensued. The latter could quickly adapt and conduct networked operations in a decentralized fashion; the former was predisposed to fighting via prescriptive plans under a centralized command and control. To achieve success, the US A
