

1. Record Nr.	UNINA9910637794703321
Autore	Parton Nigel
Titolo	Critical Child Protection Studies
Pubbl/distr/stampa	Basel, : MDPI - Multidisciplinary Digital Publishing Institute, 2022
ISBN	3-0365-5687-7
Descrizione fisica	1 electronic resource (182 p.)
Soggetti	Humanities Education
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Up until the latter years of the twentieth century, there was very little critical analysis of child protection policies and practices. The core assumption was that it was concerns about child abuse and neglect that provided the rationale and focus for child protection policies, practices, and systems, and they were assumed to be benign in both intent and impact. Increasingly, however, it has been recognised that a whole range of political, cultural, and sociological influences bear on the development and operation of child protection policies, practices, and systems and that these can have a whole range of negative consequences. The aim of this edited book, based on the Special Edition of the same title, is to provide a range of international cutting-edge papers that critically analyse different aspects of child protection, and which also provide suggestions about how child protection can be positively reformed.</p>

2. Record Nr.	UNINA9910781939503321
Autore	Wilcox Rand R
Titolo	Introduction to robust estimation and hypothesis testing [[electronic resource] /] / Rand Wilcox
Pubbl/distr/stampa	Amsterdam ; ; Boston, : Academic Press, 2012
ISBN	1-283-39408-1 9786613394088 0-12-387015-1
Edizione	[3rd ed.]
Descrizione fisica	1 online resource (713 p.)
Collana	Statistical Modeling and Decision Science
Disciplina	519.5/44
Soggetti	Estimation theory Robust statistics Statistical hypothesis testing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Machine generated contents note: Preface 1. Introduction 2. A Foundation for Robust Methods 3. Estimating Measures of Location and Scale 4. Confidence Intervals in the One-Sample Case 5. Comparing Two Groups 6. Some Multivariate Methods 7. One-Way and Higher Designs for Independent Groups 8. Comparing Multiple Dependent Groups 9. Correlation and Tests of Independence 10. Robust Regression 11. More Regression Methods.
Sommario/riassunto	"This book focuses on the practical aspects of modern and robust statistical methods. The increased accuracy and power of modern methods, versus conventional approaches to the analysis of variance (ANOVA) and regression, is remarkable. Through a combination of theoretical developments, improved and more flexible statistical methods, and the power of the computer, it is now possible to address problems with standard methods that seemed insurmountable only a few years ago"--
