Sommario/riassunto	The prevalence of salvation language in the first letter of Peter has often been acknowledged though rarely investigated in depth. In this book Martin Williams presents an account exploring the concept of salvation in this theologically rich letter. He brings together the disciplines of hermeneutics, New Testament studies, and systematic and historical theology in order to explore the language of salvation which resonates within the text. The book also elaborates on a methodological level the segregation which has arisen between biblical

studies and theological studies. In doing this, Williams identifies a basis for how there can be interaction between these two different viewpoints. This book will be a valuable resource for students and scholars interested in the exegesis and theology of 1 Peter, the doctrine of salvation and biblical interpretation.
