Sommario/riassunto	This powerful study immerses the reader in the world of homelessness and drug addiction in the contemporary United States. For over a decade Philippe Bourgois and Jeff Schonberg followed a social network of two dozen heroin injectors and crack smokers on the streets of San Francisco, accompanying them as they scrambled to generate income through burglary, panhandling, recycling, and day labor. Righteous Dopefiend interweaves stunning black-and-white photographs with vivid dialogue, detailed field notes, and critical theoretical analysis. Its gripping narrative develops a cast of characters around the themes of violence, race relations, sexuality, family trauma, embodied suffering, social inequality, and power relations. The result is a dispassionate chronicle of survival, loss, caring, and hope rooted in the addicts' determination to hang on for one more day and one more "fix" through a "moral economy of sharing" that precariously balances mutual

solidarity and interpersonal betrayal.

Sommario/riassunto	In the first decade of the twenty-first century, the biggest event of worldwide proportion was the 2008 global financial crisis, which was caused primarily by ineffective governance, failed surveillance systems, and implementation flaws. While fiscal and monetary policies succeeded in pulling many countries out of a financial freefall, most economies have performed beneath pre-recession levels as governments continued to struggle with their finances. Examining the financial crisis from the viewpoint of intangible assets provides a different perspective from traditional economic approaches. National Intellectual Capital (NIC), comprised mainly of human capital, market capital, process capital, renewal capital, and financial capital, is a valuable intangible asset and a key source of national competitive advantage in today's knowledge economy. The authors—pioneers in

the field—present extensive data and a rigorous conceptual framework to analyze the connections between the global financial crisis and NIC development. Covering the period from 2005 to 2010 across 48 countries, the authors establish a positive correlation between NIC and GDP per capita and consider the impact of NIC investment for short-term recovery and long-term risk control and strategy formulation. Each volume in a series of SpringerBriefs on NIC and the financial crisis provides in-depth coverage of the impact of the crisis, the aftermath, future prospects, and policy implications for a regional cluster. This volume focuses on Indonesia, Malaysia, The Philippines, and Thailand.
