

1. Record Nr.	UNINA9910782002903321
Titolo	Chemical safety of drinking-water [[electronic resource]] : assessing priorities for risk assessment // Terrence Thompson ... [et al.]
Pubbl/distr/stampa	Geneva, : World Health Organization, c2007
ISBN	1-281-30770-X 9786611307707 92-4-068714-9 92-4-068287-2
Descrizione fisica	1 online resource (158 p.)
Altri autori (Persone)	ThompsonTerrence P
Disciplina	363.6/1
Soggetti	Drinking water - Contamination Water quality management
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. A. Assessing and managing priorities -- pt. B. Identifying specific chemicals -- pt. C. Appendices.
Sommario/riassunto	This book provides guidance on the chemical safety of drinking-water. Chemical contaminants of drinking-water are often considered a lower priority than microbial contaminants because adverse health effects from chemical contaminants are generally associated with long-term exposures whereas the effects from microbial contaminants are usually immediate. Nonetheless chemicals in water supplies can cause very serious problems. The objective of this publication is to help users at national or local level to establish which chemicals in a particular setting should be given priority in developing st
