	Note generali	Bibliographic Level Mode of Issuance: Monograph
	Nota di bibliografia	Includes bibliographical references (pages 385-394) and index.
	Nota di contenuto	Introduction Various approaches to anaphora Predicate devices: argument-inferring morphemes Sentence devices I: the principle of direct alignment Sentence devices II: principles of argument ellipsis Discourse devices: ellipsis as the unmarked representation of samen essAlgorithm
	Sommario/riassunto	In many East Asian languages, despite the prevalent occurrence of implicit reference, reference management is largely achieved without recourse to familiar agreement features. For this reason, recovering ellipted reference has been a perplexing problem in the analysis of these languages. This book elucidates the linguistic mechanisms for ellipsis resolution in Japanese, mechanisms which involve complex processes of inference that integrate grammatical, sociolinguistic, and discourse considerations with real world knowledge.
