Sommario/riassunto	This stronger alliance gave priority to negotiating an internationally acceptable treaty and safeguarding Canada's land-based nickel industry. A second coalition - officers from the Department of Finance, the Department of Industry, Trade, and Commerce, and the Ministry of State for Science and Technology - contended that the push for quantitative restrictions diverted attention from the more crucial areas of protection of technological and financial resources. Riddell-Dixon argues that the dominant coalition succeeded because of ministerial support, structural and functional advantages, and an effective choice of tactics. Consequently they were able to manage other domestic sources of foreign policy. Canada and the International Seabed addresses several debates central to Canadian foreign policy, including the relative importance of domestic determinants and international

constraints, the nature of intra-governmental decision-making, the relationship between government decision-makers and interest groups, the role of provincial governments in foreign policy, and the role of international conferences in solving global problems.

3. Record Nr.	UNINA9910783583303321

Recent Evolution of NBFIs in Ukraine; LIST OF TABLES; LIST OF FIGURES; LIST OF BOXES; 2. Impediments to NBFI Development and Policy Reform Agenda; LIST OF CHARTS; Technical Annexes; Bibliography
Sommario/riassunto	The prospect of European integration presents huge opportunities and challenges for the development of non-bank financial institutions (NBFIs) in Ukraine. By most measures, the development of the NBFi sector in Ukraine lags far behind that of recent accession countries in Central Europe. To address the main impediments facing the development of the sector, the Ukrainian authorities need to implement a strategy based on six main pillars: 1) strengthen the capacity, independence, funding, and accountability of the NBFi regulators; 2)

develop money markets, government bond markets, and municipal
