

1. Record Nr.	UNINA9910782092803321
Titolo	Human and animal relationships [[electronic resource] /] / volume editors, A. A. Brakhage, Peter F. Zipfel
Pubbl/distr/stampa	Berlin, : Springer, c2008
ISBN	1-281-86245-2 9786611862459 3-540-79307-0
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (311 p.)
Collana	The mycota ; ; v. 6
Altri autori (Persone)	BrakhageAxel A ZipfelPeter F
Disciplina	579.5
Soggetti	Human-animal relationships Pathogenic fungi
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Pathogens -- Trichomycetes and the Arthropod Gut -- Opportunistic Mold Infections -- Entomopathogenic Fungi: Biochemistry and Molecular Biology -- Physiology and Metabolic Requirements of Pathogenic Fungi -- CO2 Sensing and Virulence of Candida albicans -- Hyphal Growth and Virulence in Candida albicans -- Pathogenicity of Malassezia Yeasts -- Techniques -- Proteomics and its Application to the Human-Pathogenic Fungi Aspergillus fumigatus and Candida albicans -- Transcriptomics of the Fungal Pathogens, Focusing on Candida albicans -- Host -- Yeast Infections in Immunocompromised Hosts -- The Host Innate Immune Response to Pathogenic Candida albicans and Other Fungal Pathogens -- Toll-Like Receptors and Fungal Recognition -- Clinical Aspects of Dermatophyte Infections.
Sommario/riassunto	Pathogenic fungi are widely distributed and can infect many organisms, particularly humans, but also other vertebrates and insects. Due to a growing number of fungal infections, there is an increasing need to understand the interaction of pathogenic fungi with their hosts. This second completely updated and revised edition of Volume VI of The Mycota consists of state of the art reviews written by experts in the field, covering three major areas of this rapidly developing field. In the

first part the current understanding of pathogenic fungi and the physiological reactions relevant for the pathogen - host interaction are elucidated. The second part describes novel technologies for the identification of proteins, virulence factors and mechanisms central to the host - pathogen interaction. The third part deals with the characterization of the host response towards pathogenic fungi and addresses timely clinical aspects.
