ISBN	1-281-39720-2 9786611397203 0-8135-4423-8
Descrizione fisica	1 online resource (326 p.)
Disciplina	363.72/8909162
Soggetti	Radioactive waste disposal in the ocean
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 291-299) and index.
Nota di contenuto	Front matter -- Contents -- Acknowledgments -- Introduction -- Chapter 1. Threshold Illusions -- Chapter 2. Radiation Anxieties -- Chapter 3. The Other Atomic Scientists -- Chapter 4. Forging an International Consensus -- Chapter 5. No Atomic Graveyards -- Chapter 6. The Environment as Cold War Terrain -- Chapter 7. Purely for Political Reasons -- Chapter 8. Confronting Environmentalism -- Conclusion -- Notes -- Bibliography -- Index
Sommario/riassunto	In the early 1990's, Russian President Boris Yeltsin revealed that for the previous thirty years the Soviet Union had dumped vast amounts of dangerous radioactive waste into rivers and seas in blatant violation of international agreements. The disclosure caused outrage throughout the Western world, particularly since officials from the Soviet Union had denounced environmental pollution by the United States and Britain throughout the cold war. <i>Poison in the Well</i> provides a balanced look at the policy decisions, scientific conflicts, public relations strategies, and the myriad mishaps and subsequent cover-ups that were born out of the dilemma of where to house deadly nuclear materials. Why did scientists and politicians choose the sea for waste disposal? How did negotiations about the uses of the sea change the way scientists, government officials, and ultimately the lay public envisioned the oceans? Jacob Darwin Hamblin traces the development of the issue in Western countries from the end of World War II to the blossoming of

the environmental movement in the early 1970's. This is an important book for students and scholars in the history of science who want to explore a striking case study of the conflicts that so often occur at the intersection of science, politics, and international diplomacy.

3. Record Nr.	UNINA9910778172503321
Autore	Luft Harold S
Titolo	Total cure [[electronic resource]] : the antidote to the health care crisis // Harold S. Luft
Pubbl/distr/stampa	Cambridge, Mass., : Harvard University Press, 2008
ISBN	0-674-04036-8
Descrizione fisica	1 online resource (337 p.)
Disciplina	362.1/04250973
Soggetti	Health care reform - United States Medical policy - United States Health planning - United States Health insurance - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Build on what you've got, but recognize real-world constraints -- Overview of a restructured health care system -- Covering the cost of care: rethinking health insurance -- Organizing care and paying providers -- Choices: harnessing data to inform decisions -- Financing SecureChoice -- Malpractice, pharmaceuticals, medical education, and prevention -- How SecureChoice would work for patients and physicians -- Getting there: policy choices, implementation, and transition.
Sommario/riassunto	Proposals to reform the health care system typically focus on either increasing private insurance or expanding government-sponsored plans. Guaranteeing that everyone is insured, however, does not create a system with the quality of care patients want, the flexibility clinicians need, and the internal dynamics to continually improve the value of health care. Luft presents a comprehensive new proposal,

SecureChoice, which does all that while providing affordable health insurance for every American.
