

1. Record Nr.	UNINA9910782117103321
Autore	Selesnick S. A (Stephen Allan)
Titolo	Quanta, logic and spacetime [[electronic resource] /] / S.A. Selesnick
Pubbl/distr/stampa	River Edge, NJ, : World Scientific, c2003
ISBN	1-281-93541-7 9786611935412 981-279-493-X
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (487 p.)
Disciplina	530.12
Soggetti	Quantum theory Special relativity (Physics)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 429-441) and indexes.
Nota di contenuto	Contents ; Part I Preliminaries ; 1. Foundations ; 1.1 Physics without Objects ; 1.2 Observables ; 1.3 Finite Dimensional Heuristics ; 2. Quantum Sets ; 2.1 Logics and Lattices ; 2.2 Some First-order Quantum Aggregates ; 2.2.1 Finite Products ; 2.2.2 Sequences ; 2.2.3 Sets 2.2.4 Subs 2.3 Quantum Set Theory ; 3. Group Duality Coherence and Cyclic Actions ; 3.1 The Duality of Groups and Hopf Algebras ; 3.1.1 Algebras ; 3.1.2 Coalgebras ; 3.1.3 Bialgebras and Hopf Algebras ; 3.1.4 The Additive Affine Group ; 3.1.5 Finite Group Algebras 3.1.6 Topological Hopf and Coalgebras 3.1.7 The Algebra of Representative Functions on a Compact Group ; 3.1.8 Tensor Symmetric and Exterior Algebras ; 3.1.9 The Universal Enveloping Algebra of a Lie Algebra ; 3.2 Quantum Versions of Cyclic Groups 3.2.1 Quantum Permutations: from $SI(n, C)$ to Z_n 3.2.2 Condensation and Coherence ; 3.2.3

Quantizing Cycles: from Zn to SI(n C)		
Part II Computational Paradigms		; 4. Natural
Deduction	; 4.1 Natural Deduction for a Minimal	
System		; 4.2 The Curry-Howard
Isomorphism		
4.3 The Gentzen Sequent Calculus		5. Quantum
Logic	; 5.1 Orthologic and its Model Theory	
; 5.1.1 Orthologic as a Deductive System		
5.1.2 Modal Logic and Kripke Models		; 5.1.3
A Modal Translation Theorem		; 5.1.4 The
Implication Problem and Orthomodular Logic		
5.1.5 Orthomodular Foundations for Quantum Mechanics		

Sommario/riassunto

In this expanded edition of *Quanta, Logic and Spacetime*, the logical base is greatly broadened and quantum-computational aspects of the approach are brought to the fore. The first two parts of this edition may indeed be regarded as providing a self-contained and logic-based foundation for - and an introduction to - the enterprise known as quantum computing. The rest of the work takes on the task (as in the first edition) of computing from first principles certain dynamical expressions which turn out to compare favorably with the Lagrangian densities of the (massless) Standard Model, i
