

1. Record Nr.	UNINA9910782124403321
Autore	Halford N. G (Nigel G.)
Titolo	Genetically modified crops [[electronic resource] /] / Nigel G. Halford
Pubbl/distr/stampa	London, : Imperial College Press, c2003
ISBN	1-281-86587-7 9786611865870 1-84816-125-5
Descrizione fisica	1 online resource (ix, 112 p. ) : ill
Disciplina	631.5233
Soggetti	Transgenic plants Transgenic plants - History Plant genetic engineering Agricultural biotechnology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	DNA, Genes, Genomes and Plant Breeding; The Techniques of Plant Genetic Modification; Current and Future Uses of GM Crops in Agriculture; Legislation Covering GM Crops and Foods; Issues That Have Arisen in the GM Crop and Food Debate
Sommario/riassunto	A description of the history and development of the science and techniques underpinning plant biotechnology, GM crops that are grown commercially and the new varieties that are developing. It covers failures as well as successes, the safety record of GM crops, legislation and consumer concerns.
